

WILL BUILD A MILL

One-hundred-ton Concentrator For the Fortune.

ACTION OF DIRECTORS

WORK WILL BE COMMENCED AT ONCE.

Company Has Sufficient Funds to Complete the Plant—Reports From Milford and Stateline Sections—Riches of the Marysville District—Mining Notes.

The directors of the Fortune Mining company held a meeting in the Commercial block yesterday afternoon to take action towards the immediate erection of a new 100-ton concentrating mill on that Bingham property. The business of the company has been augmented sufficiently to complete the plant, and it has been decided to start up the preliminary work and push the building of the mill as rapidly as possible. Estimates are being received on the machinery, and contracts will be let for the other construction work. The Fortune has been in shape for a mill for a good many months. Particular arrangements were made last spring to build the plant, but for certain reasons the plan was not carried out, and the matter was deferred until this time.

FREE COINAGE MINE.

Ore Being Sacked Preparatory to Shipment.

Scott Hamilton has returned from a trip to Alta, where he went to make an examination of the conditions of the Free Coinage mine which is being developed by Salt Lake parties. Mr. Hamilton reported to the local officers of the company that the tunnel has been completed to a depth of 25 feet, in which is disclosed ore of a very satisfactory grade. The men employed at the property are sacking it as fast as it is extracted, and a carload of ore has been shipped. Recent assays taken show the ore to contain 15 ounces silver, 75 per cent copper, 15 per cent lead and small amount of gold. A contract has been let for another 100 feet of tunnel work.

BOSTON & MERCUR SUE.

S. V. Trent Asks a Judgment For \$1,261.39.

S. V. Trent yesterday filed suit against the Boston & Mercur Gold Mining company for \$1,261.39. The money is alleged to be due as a balance on a contract for furnishing and setting up a lot of mining machinery. The plaintiff complains that the defendant failed to fulfill its part of the contract, and that it did not have the ground ready at Mercur to install the machinery as agreed. It was set up that the defendant had planned to move some machinery from Park City to Mercur, stating that it would not exceed \$2,300. The suit was filed in the county clerk's office yesterday.

NEW MINING COMPANIES.

Articles For Brewer and Trepheire Filed Yesterday.

Articles of incorporation for the Brewer Copper Mining company were filed in the county clerk's office yesterday. The capitalization is \$40,000, in 40,000 shares of the par value of 10 cents each. William M. Bradley is president, John Brewster, vice president, M. E. Evans, secretary and treasurer. The other directors are J. T. Richards and L. T. Colbath. The company owns the Emma, Tunnel, Copper and Panake claims in the Allegany district, Elko county, Nevada.

Articles were also filed for the Trepheire Mining company, details of which were published in yesterday's issue of the Herald.

CLEOPATRA SHOWING.

Vein Matter Out Into For a Distance of Twelve Feet.

Manager Clarence E. Allen of the Centennial-Eureka mine was at his desk yesterday, after a visit to the Cleopatra mine. He also made an inspection of the Cleopatra, in which he is interested, and says the cross-cut has run on the level has cut into a ledge of vein matter for a distance of twelve feet and conditions look favorable for the opening of a large body of ore. He expects the completion of the company, Mr. Allen states, to continue the cross-cut through the vein to find out what there is in it and if any ore is not disclosed, the vein will be sunk until it is encountered.

MARTHA WASHINGTON HOIST.

Directors Hold a Meeting and Delay Action.

The directors of the Martha Washington held a meeting yesterday and after a short consultation decided not to take any definite action looking to the rebuilding of their hoisting works until after the insurance adjusters have settled with the Pacific. He held stated after the meeting that no assessment would be levied as a result of the fire because such action was unnecessary. He said the company has ample funds to erect new works and continue work without it, a condition of affairs which will cause the stockholders to be satisfied. The directors will meet again in a day or so to have for the mine in a day or so in charge.

RED WING MILL.

Will Resume Operations In the Middle of October.

The new crushers ordered sometime ago for the Red Wing mill have arrived and preparations are being made to put them in place. It is expected that the plant will be ready to start up with its enlarged capacity by the middle of October at the farthest. While the mill has been closed down to make alterations the tunnel has been pushed ahead 125 feet further in the same claim of milling ore that was excavated in the preceding 30 feet, showing the vein to be continuous as far as explorations have been made.

Preparations for the mine in a day or so in charge.

SALT LAKERS IN IDAHO.

Movements of A. J. Bettles and Joe Dederichs at Hailey.

A. J. Bettles and Joseph Dederichs, the mining men who arrived from Salt Lake yesterday noon, did not lose any time after getting here. They knew what they came for, and set about it. Immediately after luncheon they drove down to Bellevue, and over to the Queen of the Smiles dam. After looking them over they put two men to work making prospect holes in the

tailings. They also looked into the water supply, and satisfied themselves that they could get enough water to concentrate 150 to 200 tons a day. They also looked over the old machinery and satisfied themselves that at least two of the dies are available, or can be made with slight repairs.

This morning they left the hotel at 8 o'clock for Broadford, where they spent the day taking samples from the prospect holes and in staking up the proposition generally. They also visited the Minnie Moore dumps and surface works.

Tomorrow they will doubtless return there, take more samples, and then await their assays, which will decide if they will take hold of the proposition.

Mr. Bettles is the metallurgist of the McCure's. He it was who mined the Granite Mountain and Elmestall ores, in Montana, which paid dividends to the stockholders amounting to millions of dollars. He is now interested in the Queen of the Smiles, in Utah, and elsewhere, but will take hold of the Queen of the Smiles with Mr. Ryan and Mr. Dederichs, if it suits him.

Mr. Dederichs is quite favorably impressed with Hailey and Wood River. Last evening he asked the local schools. Then about a dwelling house. Being told that he might have to build as there is not a vacant house in town he said that did not matter up to Dederichs owns and occupies in Salt Lake a dwelling that is assessed at \$7,500.

STATELINE PROPOSITIONS.

T. S. Coffey Reports on Conditions in That Camp.

T. S. Coffey, who is associated with Kiner, Bull and Kinney in the ownership of the Monitor mine in the Stateline district, came up from the south yesterday. He reports the Monitor as looking very encouraging at the present time, and in the opinion of the new thirty-five-foot shaft a vein of gold ore has been disclosed, which carries very gratifying values. Recent assays have returned over \$100 to the ton. The district in general is quite active at the present time. Mr. Coffey states, and at the independence mine which was recently freed from litigation, sinking continues in the shaft, which has reached the depth of 140 feet.

Francis J. Holland are developing the Jumbo shaft, which is also being put down, and everything there looks favorable.

The Amethyst, another promising property, is showing up satisfactory results. The shaft on that property is down about seventy-five feet, and a cross-cut has been run for a distance of about sixty feet to cut the vein.

The Deer Trail, owned by Pickett & Miller, which is being developed, is one of the best propositions in the Pike's Peak district of the camp, and he thinks there is no doubt about its developing into a big producer.

The Deer Lodge district, just over the Utah state line in Nevada, is looking up wonderfully, and a lot of work is in progress there at the present time.

A SECOND CRIPPLE CREEK.

Is the Opinion Expressed About the Marysville Country.

J. McCalla, the well known Cripple Creek mining man, who has spent some time lately in making investigations in the mining regions of Marysville, has returned to the city more enthusiastic than ever over the prospects of that camp. "I have seen a good many mining camps," he said yesterday, "but I have never in all my experience seen more favorable indications for the opening of some big mines than there are at Marysville."

Mr. McCalla exhibited two specimens of ore from the Wedge mine. "If I did not know where it came from," he said, "and someone had shown it to me, I would have said right away that it was produced in Cripple Creek."

He secured a small holding in Marysville, and expects to buy a large tract to add to it. Not only that, but I expect to get some Cripple Creek men interested down there who will do some work."

Mr. McCalla was up to see the Dalton mine and came away with a favorable opinion of it. He thinks it is certain to come out all right and make a good mine. Depth is what is needed most in Marysville and the sooner prospectors realize that they will get some mines.

MINES NEAR MILFORD.

Will Griffiths Returns From a Trip to That Section.

Will Griffiths returned yesterday morning from Milford, where he has been for several days looking after some of his mining interests in that locality. He reports that there is considerable work going on in that section at the present time, especially at the Montreal mine, which he states, extracting a fine grade of copper ore.

The Boston syndicate operating the Skylark property in the Beaver Lake district, is driving a tunnel to catch the main ledge crossing through the property. The management is about to get another contract to carry the tunnel nearer to the vein towards which it is directed.

Work has been suspended on the Copper Ranch, Mr. Griffiths states, for the present, but as the ground is under bond to a Boston syndicate it will likely be taken up soon.

WORK AT THE YAMPA.

Colonel Wall Has a Force of Men Drifting.

Work at the Yampa group of claims in Elko county, the property adjoining the Highland Boy, on which Colonel Wall recently took a lease, which calls for a big sum of money, is being prosecuted in a vigorous manner and the vein is being worked out in that section. The point at which was struck in the tunnel last June, though the colonel says the ore is not proving of such a high grade as he had hoped to find, is being worked out as well as the colonel would like, and unless a change soon occurs for the better it is doubtful whether he will continue development work.

HORN SILVER MEETING.

To Be Held Tuesday Next—Eastern Stockholders Not Expected.

The annual meeting of the Horn Silver Mining company will be held in this city Tuesday next, at which time officers for the ensuing year will be elected. It is expected that a large number of the stockholders will be present, but that the eastern stockholders will not be expected to attend. The meeting will be held at the Hotel Washington, which was the place at which the company was organized. The company has been very successful in its operations, and the stockholders are expected to be well satisfied with the results.

BRIGHAM YOUNG COLLEGE.

Logan, Utah.

Opens Monday, September 18. Offers the following courses: Course in General Science, four years; course in Arts, four years; Academic course, four years; Normal Training School, four years; Commercial course, one year; Special Sunday School Normal course; Mutual Improvement Normal course. A well equipped Normal Training School, comprising the beginning, first and sixth grades, is maintained in connection with the work of the Normal department. The courses in General Science and Arts lead to baccalaureate degrees. The college facilities comprise three buildings, a library, a gymnasium, a hall, and such museum and scientific apparatus as required in the various courses; a good working library and reading room, supplied with the latest papers and leading periodicals of the United States. There is also a large field of study fenced for baseball, basketball and other athletic sports. Faculty numbers twenty-six. Tuition, free. Entrance fee, \$10.00. Admission to the Normal Training School, \$5.00.

For catalogues and further information, address H. BULLEN, Jr., Sec'y Brigham Young College, Logan, Utah.

To Investigate Marysville Mines.

A party of Cripple Creek mining men went south yesterday morning to make investigations at Marysville. The crowd was headed by John Howard, who is said to have made himself rich out of the big Colorado camp a few years ago. It was stated yesterday that Mr. Howard has gone into the Butte county gold camp prepared to take up a proposition there if it suits him.

Ore and Bullion.

Ore and bullion settlements in this city yesterday amounted to \$54,850, as follows:

Commercial National bank, ores, \$8,000; Bullion, \$4,850.

Hamberger & McMillan, ores, \$7,850; Bullion, \$4,850.

McCormick & Co., silver and lead ores, \$7,800.

R. J. Jones & Co., ores, \$28,000; bullion, \$7,800.

Metal Market.

Silver, 55 1/2 cents per ounce.

Lead, 44 1/2 per 100 pounds.

Copper, 17 cents per pound.

Hamberger & McMillan, ores, \$7,850; Bullion, \$4,850.

McCormick & Co., silver and lead ores, \$7,800.

R. J. Jones & Co., ores, \$28,000; bullion, \$7,800.

Mining Notes.

The Petro company will distribute its September 25th report on Friday.

The Conklin sampling works received twelve cars of ore from Tintic yesterday.

The Princeton mine of Alta was in the market with a small shipment of ore yesterday.

Chan Gardiner has gone out to the Daisy mine on the West Dip, Mercur, for a few days.

A. T. Moon will leave today for Mercur and Tintic, where he has been called on business.

Six tons of gold ore from the eastern Oregon mines is on exhibition at the Spokane industrial exposition.

The Taylor-Drummond sampler received seven cars of ore from Tintic, one from Kingman and three from Arisco yesterday.

Superintendent Thomas Kearns came down from the Silver King last night, and attached his autograph to the company register.

The Boston & Mercur company reported at Manager Moore's gold sampling room with 200 pounds of rich gold cyanide from the Cripple.

In the shaft now being sunk on the New York mine, which is owned by the Cripple Creek property, a vein of gold ore has been discovered to a depth of about 100 feet.

Colonel Hefron went out to Bingham yesterday to see up the work being done on the property of the Bingham Copper & Vanadium company.

Hon. A. J. Selfridge of Boston, who has been in the mining sections of Idaho on a tour of inspection, came in yesterday and registered at the Knickerbocker.

The development work at the St. Joe mine, which is owned by the Cripple Creek property, is being prosecuted with vigor.

Ben Butler mine, Bingham, has written that it will have a shipment of ore ready for shipment by the last of October.

Manager P. T. Farnsworth of the Horn Silver left for the south yesterday night, to take a tour of inspection.

The members of the Utah Exchange will have a meeting tonight at the office of Smith & Free, at which it is expected some important matters relative to the work of the organization will be discussed.

Virginia Enterprise: Following is a copy of a letter received from the office of the Comstock Pumping association by Manager Ryan: At 5:20 this morning water was seventy-eight feet in the shaft below 1,300 station. Stopped No. 2 elevator at 1,300 station.

Wood River Times: Joseph Beck, superintendent of the Aetna Mining company, left today for Salt Lake, to urge the directors to allow him to put the mine to work. The mine is looking first rate.

But he has five or six men working outside the mine, and he is naturally a very slow way of opening a mine.

Judge W. W. Wallace of Marysville, who has been in the city for some time on business, will leave for camp this morning, fully prepared to start up development work on the Highland Boy mine, which adjoins the Wedge mine. An eighty-foot tunnel has been driven into the mountain, and it is expected that it will be the intention to run a drift on the vein already encountered, to open up the mine.

Johnston Journal: General Manager P. T. Farnsworth of the Bingham Copper company arrived in Boston today from the west. He is expected to stay in the city for some time, and will be the guest of the Bingham Copper company.

It is expected that the Bingham Copper company will be able to start up the mine by the end of the month.

It is also expected that the Bingham Copper company will be able to start up the mine by the end of the month.

CURB SALES STILL HIGHER TERRIFIC JUMP IN PRICE

DETERMINED MEDAL CONTEST WILL NOT TAKE PLACE.

Committees meet and Complete Arrangements for the Three Days' Sessions—Features of Convention.

A special meeting of committees of the Women's Christian Temperance union was held yesterday afternoon, to complete the plans for the state convention of temperance workers which meets here next week.

The session of the refreshment committee reported that she found it impossible to find a chairman, so Mrs. W. H. Tibbals was appointed in her place. Her assistants will be Miss Baker, Mrs. Logan, Mrs. Hal W. Brown and Mrs. T. C. Robinson. This committee is to meet with Mrs. Tibbals at 2 p. m. today in the parlors of the Young Men's Christian association.

In the absence of the president, Mrs. Anna S. Angier acted as chairman of yesterday's session, and Mrs. Savory as secretary.

The session of the convention will be held in the Commercial block, Thursday, Friday and Saturday of next week. The committee having in charge consists of Mrs. C. C. Smith of Ogden, state president, and Mrs. W. H. Tibbals, Mrs. L. L. Shepard and Mrs. Logan.

From Mrs. Lee of Spanish Fork, who had charge of the Demarest gold medal contest, which was scheduled for Thursday night, comes the report that this feature of the program cannot be carried out. Mrs. Lee has several silver medalists in Spanish Fork who were anxious to enter the contest, but after finding that the contestants were to come from Springfield only, and that they were not to have an opportunity to try the oratorical powers on the young people of Salt Lake and Ogden, they declined to enter.

This failure has been reported to Mrs. Smith in Ogden, and a most attractive program for the opening evening (Thursday) has been arranged instead.

Rev. George Bailey will welcome the visitors of the city, on behalf of the pastors, while Mrs. Clarence T. Brown will extend the welcome to the women of the city, on behalf of the Young Women's Christian Temperance union.

Mrs. Randolph Smith of Ogden, the well known club woman, will respond.

Mrs. George F. Goodwin will preside at the organ during the day sessions, and on Thursday evening Mrs. L. C. Miller will give two solo numbers on the pipe organ. Mrs. Cooke will sing, and there will be other musical numbers throughout the sessions.

Thursday's closing address will be made by the new pastor of High church, Rev. Joel Smith. His subject will, of course, be a temperance one.

Among the other noteworthy features of the general programme will be a paper by Mrs. E. Allen on "Temperance in the Home," and one by Mrs. H. G. McNeely on "Hygiene." Mrs. L. L. Shepard will conduct the open parliament.

Tabler's Buckeye Pile Ointment cures blind, bleeding, itching and protruding piles. It is inflammation, soothes inflamed surfaces and reduces swelling. No waiting for results. Relief comes at once and a cure promptly follows. Recommended by physicians because it is so safe, so sure, and is the only radical cure without operations. It contains the active principle of the Buckeye, the newly discovered specific for piles, and is not an experiment, but a medical certainty. Price, 50 cents in bottles; 75 cents per box for handy application. Can be sent by mail.

Sold by Z. C. M. I. Drug Department.

Decided to Suspend.

In the face of these reports and the advice from Liverpool, President Barker convened the directors early in the afternoon and it was then decided to close the future market until Monday, in order to permit the brokers to recover from their shock and endeavor to get the market back to normal.
